surprised -	exceptionally	richest	-	memorable +
22	simply -			

Task 3

23	wide +
24	huge -
25	high +
26	excellent -
27	intense (Intense) -

Task 4

28	
29	
30	

Continue.

There are only two types of people nowadays. First type believes in global w and worried about its issues. Second type is thinking that global warming is a Lie. A TV-star and director of American Natural history museum, Neil Tyson said: "I'm often asked whether I believe in global warming. I now just reply with the question: Do you believe in gravity?" In my opinion, Neil wants to say that global warming is exists like gravitation.

Of course, his point of view is really right. Now, ice of north pole's ice turns into the water which makes world ocean level is higher. Also, global warming makes many issues for ecology. For example: dying animals which are dying because of high temperatures.

In conclusion, I want to say that global warming is ^{the} most important problem of nowadays and we must solve it together.
